# Learn more about Google Search Console

Google Search Console is a free tool that allows people to learn useful information about their business' website. The tool lets users monitor, maintain, and troubleshoot their site's presence, which increases the site's overall performance and makes users more likely to enjoy spending time on the site.

Google Search Console has lots of capabilities. Whether you want to see an analytics report of your site, make HTML improvements, set up sitemaps, or something else, Search Console gives you total control over your website.

If you are interested in learning more about Google Search Console, check out the video series below.
